FOR IMMEDIATE RELEASE

I have entered the race for Florida House District 31 because I'm appalled at the extremist voting record of our representatives in Tallahassee over the last few years. They are clearly pandering to the far-right of the Republican party, fanning the flames of the culture wars and giving their full support to want-to-be-dictators. Rather than working to make living here more affordable and to improve our quality of life, they have chosen to chip away at the rights & freedoms of residents and businesses.

The national media's rhetoric has made us so tribal that many believe a Democrat can't win here in Brevard County. But I know the people of this district are sick of the culture wars and want real representation to make progress on the issues that affect our daily lives like; lowering insurance premiums, ensuring we have world-class public education that prepares every student to successfully compete in our diverse economy, protecting reproductive freedom, including access to contraception & IVF, and so much more.

I'm confident that when voters learn what I stand for and that I will represent their interests, the choice will be clear, and we will have new representation next year.
